The Higashiyama Council for Tourism, Transportation and the Environment

The Higashiyama Council for Tourism, Transportation and the Environment

This council was formed to address issues involving tourism, transportation and the environment which are unique to the Higashiyama area as a year-round tourist spot. Because the Japanese words for tourism, transportation, and environment all begin with the letter K, we have decided to call them the 3K issues. To solve these issues and to provide more information about Higashiyama to enliven the area, local temples and shrines, businesses, and other groups joined together to form the council in September 2005. So far, we have worked on various projects, including stationing traffic directors and setting up Higashiyama Tourist Toilets.
